Dear Members of the Media in the Boston Area,

Your viewers and readers are hoping for stories about blinding headlights. They want to know who is working to solve this crisis. Did you know that LED headlights have never been approved by NHTSA? LEDs are toxic, hazardous, and discriminatory light beams and not at all what NHTSA has approved for illumination of a roadway.

Please share our petition with your viewers and readers. <https://www.change.org/p/u-s-dot-ban-blinding-headlights-and-save-lives>

Sincerely,

Mark Baker
President
Soft Lights Foundation
