5/9/2025	"Blinding LED headlights not only damage my precious (to me) eyesight, they double my chances of hitting on-coming cars, parked cars, pedestrians, and animals. If driving is a right, so should be the right to protect my own eyes and my right to feel safe , when driving. I'm more concerned about accidents from LEDeadlights than I am about alcohol, drugs, or sleep-deprivation."
5/3/2025	"I have almost been in multiple accidents due to the glare of LED headlights, particularly when the vehicle is modded or lifted and the angle of the headlights is not adjusted. Bright headlights should be taken more seriously - they're more than a nuisance, they're a full-on hazard."
