Mark,

Response below from Stealth Monitoring.

The Mobile Surveillance Unit at the Tesla Supercharger Station in Woodland is equipped with LED strobe lights. These lights serve as a strong visual deterrent and help prevent incidents before they occur.

However, we understand they're causing concerns at this location. A technician will be dispatched to the site as soon as possible to disable the lights. I'll follow up to confirm once that's been completed.

The blue LED strobe lights will be disabled tomorrow morning, 9/23/2025.

Thank you,

Lisa Rabello
